

THIS POSITION HAS BEEN FILLED

SQL Database Developer - Luxembourg

The Company

behave! was incorporated in 2012. We are the provider of the behave! Apps distributed through the 320,000 Bloomberg Professional Terminals.

We exploit various market anomalies and inefficiencies based on behavioral finance in worldwide equity markets. Our software is used by equity fund managers, portfolio managers and traders.

Your Mission

You will start from an existing MS SQL 2008 R2 database by making substantial changes and improvements related to the development of a new financial application. You will report directly to the CTO and actively take part in the design of the new application.

Your Profile

- Four-year degree in Computer Science, Information Technology, Computer Engineering or related IT discipline
- Minimum 2 years of hands on experience in backend MS SQL programming, including highly optimized functions, procedures and complex Transact SQL code
- Excellent programming standards (annotation, structure, efficiency, ...)
- Speak English and/or French
- Some experience in Python. Microsoft .NET framework is a plus
- Excellent analytical, reasoning and problem-solving abilities
- Autonomy to work effectively with minimal supervision

If you have a passion for coding, looking to build up your own IT department as the company scales up, we offer an attractive package, including equity, the opportunity to join a young company in a dynamic work place.
